## **DETAILED ACTION**

### ***Information Disclosure Statement***

The listing of references in the Search Report is not considered to be an information disclosure statement (IDS) complying with 37 CFR 1.98. 37 CFR 1.98(a)(2) requires a legible copy of: (1) each foreign patent; (2) each publication or that portion which caused it to be listed; (3) for each cited pending U.S. application, the application specification including claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion, unless the cited pending U.S. application is stored in the Image File Wrapper (IFW) system; and (4) all other information, or that portion which caused it to be listed. In addition, each IDS must include a list of all patents, publications, applications, or other information submitted for consideration by the Office (see 37 CFR 1.98(a)(1) and (b)), and MPEP § 609.04(a), subsection I. states, "the list ... must be submitted on a separate paper." Therefore, the references cited in the Search Report have not been considered. Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a).

### ***Drawings***

1. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81(c). No new matter may be introduced in the required drawing.

Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

Applicant should note that currently there are no drawings in this application file. At the time of preparation of this Office action, the undersigned obtained drawings from the foreign priority document in the file to facilitate examination of the application. Applicant must file new drawing sheets within the application that correspond fully to the application disclosure and thus do not introduce new matter into the application.

### ***Specification***

2. The abstract of the disclosure is objected to because legal phraseology should be avoided in the abstract. Currently, "consists of" is on line 1 of the abstract and "said" appears on lines 2, 3, and 5-7 of the abstract. It is also noted that "plural", on line 5 of the abstract should be replaced by --plurality--. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-10, 12-19, and 21-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "the layer interval", "the guide mesh", "the clamp", and "the grid gap" all lack antecedent basis within the claim.

In claim 2, "the matching stoppers" lack antecedent basis.

In claim 4, it is unclear as to what applicant intends to claim as his invention with respect to the "hybrid of a) and b)".

Claim 9 currently recites two sentences, which is improper claim format.

In claim 12, "the layer interval" lacks antecedent basis.

In claim 17, "the corresponding clamps" lacks antecedent basis.

In claim 19, "the locating blocks" and "the matching stoppers" lack antecedent basis.

In claim 21, it is unclear as to what applicant intends to claim as his invention with respect to the "hybrid of a) and b)".

In claim 24, "the clamps" lack antecedent basis.

Claim 26 currently recites two sentences, which is improper claim format.

In claim 27, "the grid bars" lack antecedent basis.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 11, 12, and 20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Warren (Figs. 1-3) or Nutter (Figs. 1, 6, and 7).

***Allowable Subject Matter***

7. Claim 1-10 would be allowable if rewritten or amended to overcome the rejections under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
8. Claims 13-19, and 21-27 would be allowable if rewritten to overcome the rejections under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
